DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed on August 15, 2005. Per the received amendment, claims 1,3,4, and 32 are amended, and claims 2,17-18, and 20-31 are cancelled. Claims 1,3-16,19, and 32-48 are currently being considered.

Response to Arguments

2. Applicant's arguments, see Remarks pages 9-12, filed August 15, 2005 with respect to the rejection(s) of claim(s) 1,3-16, 19, and 32-48 under Yamauchi (U.S. Patent No. 6,819,917) in view of McGraw (EP1045574) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Application 09/972,537 by the same inventor of the present application.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1,3-16,19, and 32-48 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1,4-17, 20, and 61-77 of copending Application No. 09/972,537. Although the conflicting claims are not identical, they are not patentably distinct from each other because in the present application a facsimile machine is used to print a document, while in the 09/972,537 application, a printer is disclosed. Since the facsimile machine in the present application is being used to print a document, it is asserted that both applications present the same functionality.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
